

Print Audit is the most powerful print management and print tracking system in the world.

It is comprised of three components called **Analysis**, **Reduction** and **Recovery**.

These components can be purchased as a suite or individually.

Print Audit's seamless integration with **Copy Audit**, provides a complete solution for document tracking and cost recovery.

STANDARD FEATURES:

- * Easy enterprise wide installation to any number of machines.
- * Tracks 100% of printing, including local, networked and direct to IP.
- * Bullet-proof security that cannot be overridden.
- * Support for SQL or Access back-ends.
- * Client-based architecture for low network overhead.
- * Does not require a print server.
- * Easy, centralized configuration and data storage.
- * Network integration with Windows NT, Active Directory and Novell Directory Services.
- * Convenient installation wizard.
- * Free and unlimited technical support.

"PRINT AUDIT HAS EVERY FEATURE WE COULD WANT AND IT'S WONDERFULLY RELIABLE"

Lonnie Unger - Collison Analysis Ltd

ANALYSIS

Most companies underestimate their printing needs and expenses by as much as 50%. Print Audit 5 Analysis is the easy way to get an exact picture of enterprise printing volumes.

KEY FEATURES

- * Tracks printing silently behind the scenes.
- * Powerful volume analysis reporting tool.
- * Tracks printer port, color information, number of pages, number of copies, network user and more.
- * Silently installs to tens, hundreds or thousands of workstations.
- * Automatic color and monochrome tracking.

"UNTIL PRINT AUDIT, WE HAD NO REAL PICTURE OF OUR PRINTING EXPENSES."

Dawn Johnson - Architectural Alternatives

BENEFITS

- * Learn who is printing what and where.
- * Produce reports that can help identify equipment inefficiencies and bottlenecks.
- * Relocate printers on analysis and ensure that the most efficient printers are being used the most.
- * Print Audit 5 Analysis will create an inventory of all printing devices, often discovering hardware that was not approved.

Reduction

Without a print management solution, most companies find their printing costs are running out of control. In a typical enterprise, printing and document production expenses are the third highest after payroll and rent.

KEY FEATURES

- * Redirect print jobs from high-cost to low-cost printers.
- * Utilize printer limits with customizable pop-up messages.
- * Disallow printing by user, device and color.
- * Force duplex printing.
- * Control color printing.
- * Notify users of job cost before they print and suggest lower cost alternatives.

BENEFITS

- * Reduce waste and abuse through the knowledge that all printing is being monitored and the stacks of paper left on printers at the end of each day will disappear.
- * Reduce document creation costs by up to 25%.

“BEFORE PRINT AUDIT OUR INKJET COSTS WERE SOARING...PRINT JOBS ARE NOW TRANSFERRED TO COST EFFECTIVE COPIERS”

Philip Cain - Southgate Academy

Recovery

Companies that are still trying to track and bill for printing and plotting manually could be missing up to 80% of recoverable costs. Print Audit 5 typically has an ROI of 2 to 6 weeks when used for cost recovery.

KEY FEATURES

- * Optional client code validation through a user-friendly pop-up window.
- * PIN codes and declining balances for charging users.
- * Integrates directly with accounting software.
- * Up to 5 customizable (user-defined) fields for

Print Audit 5 Job Settings - New Job
