## Copy Audit 5 Export Configuration for Prolaw

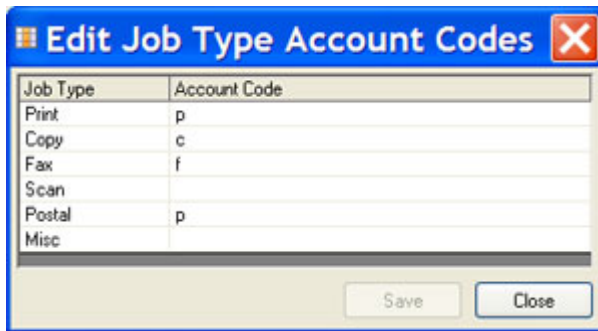

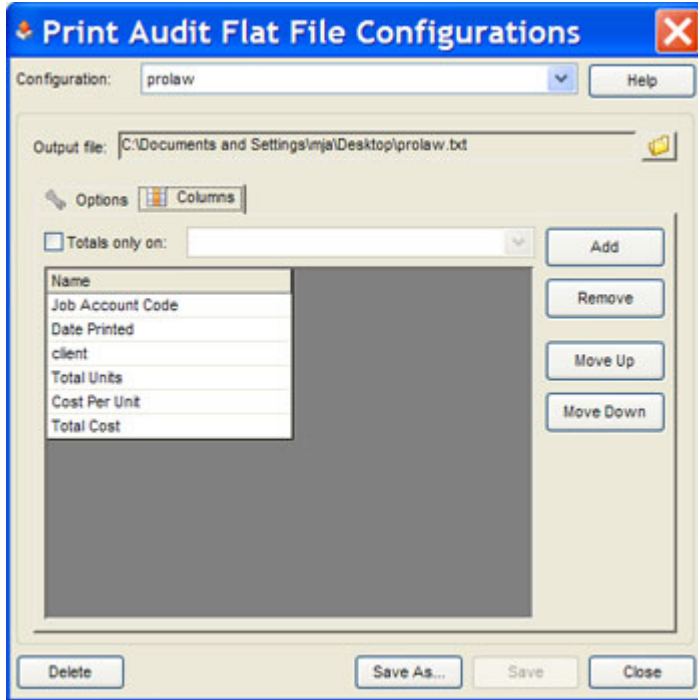

Configure the CopyAudit|Print Audit Program to export records to Prolaw Time and Billing which are imported into client bills.

To create the Prolaw export configuration, go to Print Audit 5|Reports|Job Manager|Tools|Export Results|Configurations. Create the screens below and save the configuration.

To create the actual export file for Prolaw, go to Print Audit 5|Reports|Job Manager|Accounting|Run Accounting.

# Transaction Recovery Systems, Inc.

The above configuration will generate an export file that contains detailed records in this format:

"Job Account Code", "Date Printed(mm/dd/yy)", "Client Code", "Total Units", "Cost per Unit", "Total Cost"

That looks like this:

```
"f", "03/30/06", "100-00", "9", "0.10", "0.90"  
"c", "03/30/06", "100-00", "3", "0.10", "0.30"  
"c", "03/30/06", "100-00", "1", "0.10", "0.10"
```

The fields exported from CopyAudit are:

Job Account Code  
Date Printed  
Client  
Total Units

# Transaction Recovery Systems, Inc.

---

Cost per Unit  
Total Cost

To import the file created into Prolaw, refer to their documentation.
